Profile

Third-year Computer Science undergraduate specializing in **Software Engineering and Information Systems**, seeking a final-year internship to apply software development skills. Helped modernize an internship management platform at **STEG** and built conversational assistants during two GenAI hackathons. Projects combine **React/Next.js** interfaces, **Node.js/Express** services, language-model APIs, and Python development.

Experience

Société Tunisienne de l'Électricité et du Gaz (STEG)
Aug 2025 - Sep 2025

Software Development Intern - Internship Management Platform

Modernized the platform as part of a three-person team.

- **Interfaces and dashboards:** Developed views for four roles - administrator, director, supervisor, and intern - and improved navigation and responsive layouts.
- **Visualization and filtering:** Integrated Chart.js charts, filters by period, department, and supervisor, and asynchronous data refresh.
- **Usability and validation:** Added list pagination and performed cross-browser compatibility testing.
- **Project stack:** PHP, SQLite, JavaScript, HTML/CSS, and Chart.js; platform covers internship tracking, reports, evaluations, and certificates. Code: STEG Internship Platform

Projects

Tunisian Law AI Assistant - Tunisian Legal Information
Apr 2026

GenAI 'Coding with Generative AI' Hackathon, 2nd Edition - 4th place

- **Multilingual assistant:** Contributed to a team-built legal-information assistant with Arabic, French, and English interfaces, including right-to-left support.
- **Documents and AI:** Built with Next.js/TypeScript and the Groq API; loads JSON and Word legal documents, chunks content, and selects passages by relevance. **Stack:** Next.js, TypeScript, Tailwind CSS, Groq, Mammoth. GitHub

CarDoc AI - Vehicle Diagnostics Assistant
Apr 2025

GenAI 'Coding with Generative AI' Hackathon - IEEE Club, Centrale IT - 48 hours - 2nd place

- **Web application:** Contributed to a team-built assistant that suggests diagnostic directions from user-described symptoms; React interface connected to a Node.js/Express backend and the OpenRouter API.
- **Offline Python edition:** Streamlit interface with chat history, spaCy language processing, and a rules-based diagnostic engine in French and English, without an API key.
- **Stack:** React, Vite, JavaScript, Node.js, Express, OpenRouter; Python, Streamlit, and spaCy. GitHub

Personal Portfolio - Projects and Background

- **React interface:** Presents projects, skills, achievements, and education; bilingual French/English content, downloadable CV, and GitHub repository links.
- **User experience:** Responsive layout, light/dark themes, scroll animations, and reduced-motion support. **Stack:** React, Vite, Tailwind CSS. GitHub

Education

Université Centrale, Centrale IT
Sep 2024 - Present

Bachelor's degree in Computer Science - 3rd year; Software Engineering and Information Systems

- **Coursework:** Data structures, software architecture, databases, web development, artificial intelligence, and software testing.

Lycée Hammam Lif
Jun 2024

Tunisian Baccalaureate in Computer Science

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, PHP, SQL, C, C++, HTML5, CSS3.
Web development: React, Next.js, Node.js, Express, Spring Boot, Tailwind CSS, Chart.js, Vite; responsive interfaces, dashboards, and API integration.
Applied AI: Language-model integration through OpenRouter and Groq, conversational assistants, document processing with Mammoth; Streamlit, spaCy, and rules-based diagnostics in CarDoc.
Data and tools: SQL, SQLite, Git, GitHub, VS Code, n8n.

Additional Training

Software Testing - Centrale IT — Jun 2026
Prompt Engineering and Digital Skills - Centrale IT — Apr 2026
Web Certification (HTML, CSS, JavaScript) - Le Wagon — May 2025
